

WINTER OUTERWEAR 2026.2027

STILL INDEPENDENT. SINCE 1992.

WELCOME TO SEASON 34

It's crazy to think how we've evolved over the decades from a young start up in 1992 to the global outdoor community of today. There's so many things going on in the world today, it's nice to turn the volume down and just feel for a minute.

The feeling of getting outside, the feeling of that first winter dump and the feeling of stoke when you are cruising with your friends up the first chair. I feel blessed that we're able to use these experiences and translate them into incredible products that transcend and get you excited. We have a lot of milestones this next season: 10 years of GORE-TEX, an introduction of WINDSTOPPER® BY GORE LABS through the 686 lens, countless collaborations, extensions of categories and solidifying our B Corp status using business as a force of good.

Welcome to Season 34-LFG!

Michael Akira West
Founder & CEO

A home for independent thinkers,
visionaries, risk-takers, nomads
and the like.

// Still Independent. Since 1992.

INTERSECTING PATHS: COMMUNITY & COORDINATES

A study in movement—not just across landscapes, but between people. As we travel, we gather more than miles and clips. We absorb conversation, textures, silhouettes, and sounds. We trade stories. We leave traces. We take inspiration. The collection draws from this exchange: garments shaped by the journey and styled in reflection of the world around us. Each piece becomes a visual dialogue between place and person—a wearable reminder that style can be both self-expression and shared language.

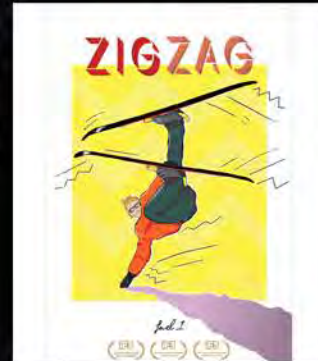

10 YEARS OF GORE-TEX: A DECADE OF DISRUPTION

2016

SMARTY® x GORE-TEX

The first 686 x GORE-TEX jacket featured the original, trademarked SMARTY® 3-in-1 system — a removable Primaloft® liner vest and pant inside lightweight GORE-TEX poly shells. These thoughtful and technical designs set the standard for the 686 x GORE-TEX partnership.

2018

Parker Ends Zig Zag

The GORE-TEX SMARTY® Weapon takes center stage in the ski world as Parker White films a prolific end segment and lands the cover of Level 1's Zig Zag.

2019

An Award-Winning Dispatch

The first 686 x GORE-TEX bib ever was created with intention — to find a hole in the market. This bib, designed on a backcountry trip to Japan and developed with Mammoth Unbound, resulted in three "Gear of the Year" awards and a bib that remains best-seller season after season.

2022

GORE-TEX Pro Thermagraph®

An introduction of the first ever GORE-TEX Pro with any form of insulation. No previous insulated GORE-TEX Pro style had ever passed the GORE-TEX breathability requirements. The 686 GORE-TEX Pro 3L Thermagraph® Jacket broke barriers and introduced strategically engineered Polartech® Alpha™ panels taped to the GORE-TEX Pro 3L back panel.

2023

Embrace Creativity. Jump Boundaries.

The GORE-TEX 3L ATV Collection: Imagined by Gigi Ruff for ultimate performance in all terrains. This new style flipped GORE-TEX 3L designs by focusing on aesthetics and introducing one of the baggiest tech-forward GORE-TEX 3L designs ever created — meant to look as good on the clip as it feels on the ascent.

2017

A Linear Perspective

The introduction of five unique styles of gloves and mitts that ranged from high end leather to entry level. This initial offering included the now ubiquitous Linear Glove, which is still in the lineup in its near-original form 10 years later.

2017

Mary in Wonderland

The signing of Rookie of the Year, Mary Rand, and her subsequent journey into the backcountry breathed life into the 686 GORE-TEX Wonderland Jacket. This no non-sense design introduced the current durable Nylon GORE-TEX fabric into the lineup.

2019

Drink from your Jacket

The introduction of 686 exclusive patented Hydrastash in-apparel hydration system into GORE-TEX Outerwear. The jacket was matched with a collaborative boot with Salomon in the same colorway.

2020

It's GORE-TEX!

An inside joke turned into reality with the official 686 x Seinfeld x GORE-TEX partnership and recreation of the iconic jacket from the Seinfeld "The Dinner Party" episode.

2023

The Atlas Era Begins

The award-winning short film Atlas debuted the GORE-TEX Dojo pant—a loose-fit nylon style worn by all four riders —showing that GORE-TEX belongs in the streets as much as the backcountry.

2025

A Natural Choice for Natural Selection

Three different 686 athletes compete in NST wearing 686 x GORE-TEX garments. Blake Moller takes second place and Gigi Ruff takes third in snowboard, while Parker White is the first skier to ever drop in the inaugural NST Ski event in Alaska.

ON ANY DAY. IN ANY CONDITION.

When we designed our first waterproof hoody nearly a decade ago, many doubted that outerwear could be anything but purely technical. Today, our weatherproof hoodies—some of our most sought-after pieces—are joined by our most advanced fabric yet. Introducing the GORE-TEX Windstopper Hoody, a lightweight, windproof and water resistant hoody designed to excel in any condition and all terrains.

Lightweight. Windproof. Breathable. Water Resistant.

WINDSTOPPER® PULLOVER HOODY BY GORE-TEX LABS

Our most technical all-weather pullover hoody. Ever.

Lightweight. Stretch. Oversized. Team Approved.

TEAM WATERPROOF HOODY

A built-for-riding version of your daily hoody.

The Original. Fleece-Lined. Heavyweight.

WATERPROOF HOODY

Because you deserve to wear a hoody in powder.

LEATHER. LINEAR. LINER. AND EVERYTHING IN-BETWEEN.

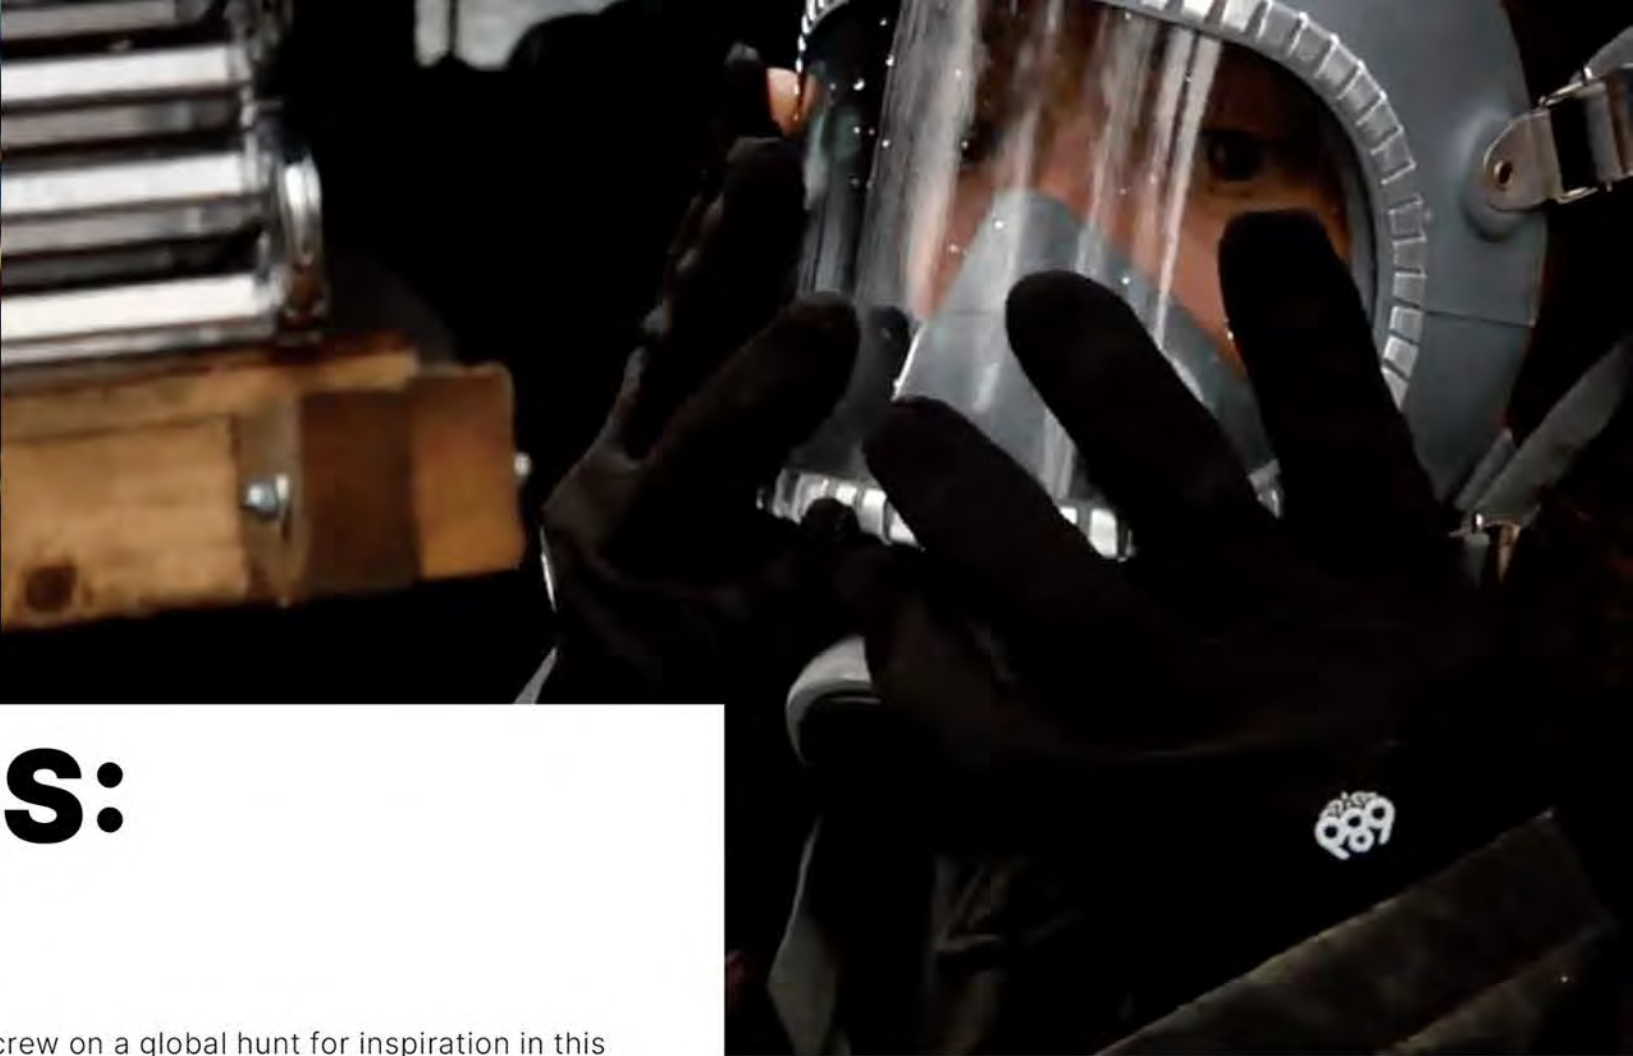

We don't have to tell you about our collection, one look and the value becomes apparent. We didn't set out to just design new gloves to sell. We set out to design road trips waiting to be taken, new tricks ready to be learned and stories waiting to be told.

From the new high-end GORE-TEX Leather Stronghold Glove to our iconic entry level GORE-TEX Linear and to the new affordable and team-driven Crush and evolved Pipe Glove silhouettes we remain focused on movement—on the hill, in your shop, and out the door.

Whether your customers are looking for a statement piece for the hill or simply comfort in the chaos of a storm, we've got something for them.

Welcome to the new 686 Glove & Mitt collection —an evolved offering focused on price, tech, style, and sell-through.

AIM FOR THE BUSHES: A GLOBAL SKI FILM

A DECADE OF FREESKIING. Parker White grabs the **ATLAS passport** and leads the 686 ski crew on a global hunt for inspiration in this redefinition of freestyle skiing. Director [Oliver Hoblitzle](#) provides an introspective vision of the future state, documenting this small crew and providing a portrait of friendship, movement and the moments in between. The journey is as varied as the team themselves—from the spines of AK to the forgotten architecture of Lithuania, this unique group traverses terrain with nowhere to be, but everywhere to go.

We are committed to a continuous journey of improvement and positive contribution to the world we live and play in and using our business as a force for good. B Corp certification designates that we've met B Corp community standards of performance, accountability, and transparency on factors from employee benefits and environmental management to supply chain practices and input materials.

BUSINESS AS A FORCE FOR GOOD

CLIMATE FOCUSED

We are committed to a minimal carbon footprint, primarily through rigorous waste reduction strategies.

A pioneering approach of partnering with our factories and using state of the art production technology has led to a top-tier 87% fabric cutting efficiency. This means that every year we save miles of fabric from going to the landfill and use this fabric in our products.

ENGINEERING WAYS TO CREATE MORE WITH LESS

As a climate neutral certified brand, we annually measure and offset 100% of corporate ghg emissions including athlete travel – totalling 18,500 tonnes of co2e (reduced from previous year's 27,000 tco2e) of ghg and we have a progressive ghg reduction plan that is vetted and approved by change climate.

Through targeted strategies, we have reduced the impact per unit of product nearly 1% yoy from 2023 to 2023 and continue to produce with less impact through new choices in 2025 with lower carbon and climate impacts.

LOCAL TO GLOBAL PHILOSOPHY

We are committed to the communities surrounding our home in los angeles and our local mountains with outreach efforts providing support and access, and also onboarding our factories onto assessment models which will allow for sustainable systemic changes that provide better wages, health, and safety to the workers who produce our products.

At home, we have provided support and access to organizations including hoods to woods, service board, sos, riding on insulin, stay, ron finely foundation, boys & girls club hollywood, boys & girls club watts/willowbrook, charity: water, b4bc, shred foundation, revert foundation, and skate like a girl and globally we have onboarded manufacturing partners responsible for nearly 80% of our production onto the higg facility social and labor model.

MANUFACTURING GOODS ISN'T SUSTAINABLE

SHELL FABRICS

100% RECYCLED -

All Gore-Tex Polyester Fabrics; All Gore-Tex Nylon Fabrics; All GLCR Polyester Fabrics

NEW 100% RECYCLED FOR WINTER 26/27 -

GLCR Base + GLCR Prints (except GLCR Grid Fabrics); 686 Base + 686 Prints

24% RECYCLED POLYESTER FABRIC

Ripstop Colorways – (Geo Jacket Moss Green, Nightline Jacket Khaki, Foundation Jacket Bronze, Camber Jacket (Dark Earth), Hot Lap Bib (Bronze), Ghost Anorak (Dark Earth), Ghost Pant (Dark Earth), Nightline Pant (Khaki), Hellkat Pant (Black))

43% BIO-BASED SORONA® FABRICS

SMARTY® 3-in-1 Rodeo Jacket, SMARTY® 3-in-1 Framework Jacket, GORE-TEX Windstopper® Hoody. These Fabrics Generate 50% Fewer Greenhouse Gas Emissions and Help Reduce Our Dependence on Oil and Petrochemicals

NEW 2627 RECYCLED FABRICS

Logic Jacket, Atom Jacket, Liberty Jacket, Form Smarty Jacket, Geo Jacket (Chamois Grid Has Khaki + Navy), Nightline Jacket (Navy Dark Earth + Camo Only), Foundation Jacket (White Wire & Black Only), Hot Lap Bib (Not Bronze Rip Stop), Essex Pant, Infinity Cargo Pant, Nightline Pant (Black & Navy Only), GORE-TEX WINDSTOPPER® Guideline Jacket, Search Jacket, Hologram Jacket, Outline Anorak (Only White), Athena Jacket (Not White Slub), Black Magic Bib (Black & Limestone Only), Outline Pant (Black & Limestone Only), Aura Pant, Slimline Pant, All Boys Styles, All Girls Styles

COTTON-LIKE POLY 50% RECYCLED POLYESTER + 50% POLYESTER

Foundation Jacket (Fatigue Green), Spellbound Jacket (White), Spirit Jacket (Limestone), Outline Anorak (Fatigue Green), Outline Pant (Fatigue Green)

RESPONSIBLE DOWN STANDARD

RDS approved down is used in the GORE-TEX WINDSTOPPER® Pyro Down Puffer and GORE-TEX WINDSTOPPER® Union Down Puffer

686 LIFETIME WARRANTY

All 686 production; all outerwear is backed by our 686 Lifetime Warranty.

RECYCLED INSULATION

85% Recycled Infiloft® Insulation – All Gore-Tex Insulated Products; All Thermagraph® Warm Panels; All GLCR Insulated Products.

PFAS FREE

All outerwear, accessories and apparel utilizes PFAS Free laminates, PFAS Free C0 DWR And PFAS Free materials and trims.

For Winter 26/27, 77% of our styles now use recycled fabrics. This lowered dependency on virgin materials aids in our approach towards our science-aligned emissions reduction targets (Scope 3) in line with a 1.5°C decarbonization pathway.

The production of goods is inherently not sustainable. We believe that informed decisions and hard work can help reduce our environmental impact so that the snow is just as deep for our grandkids as it is for us. We are committed to making material, design and shipping choices that better balance performance, price and planet.

SHIPPING

Our goal is to ship 100% of production goods via ocean. Switching from air to ocean for every tonne of apparel shipped could save around 91-98% reduction in GHG emissions

AIR 4%
OCEAN 96%

THERMAGRAPH® ACTIVE

■ REGULATE HEAT AND MOISTURE DURING CHANGING CONDITIONS.

686 Thermagraph® Active is engineered for ultimate moisture and temperature control during intense start & stop skiing and snowboarding sessions.

THERMAGRAPH® BODY-MAPPED LINING SYSTEM

Warmth only where you need it and maximum breathability to keep moisture out.

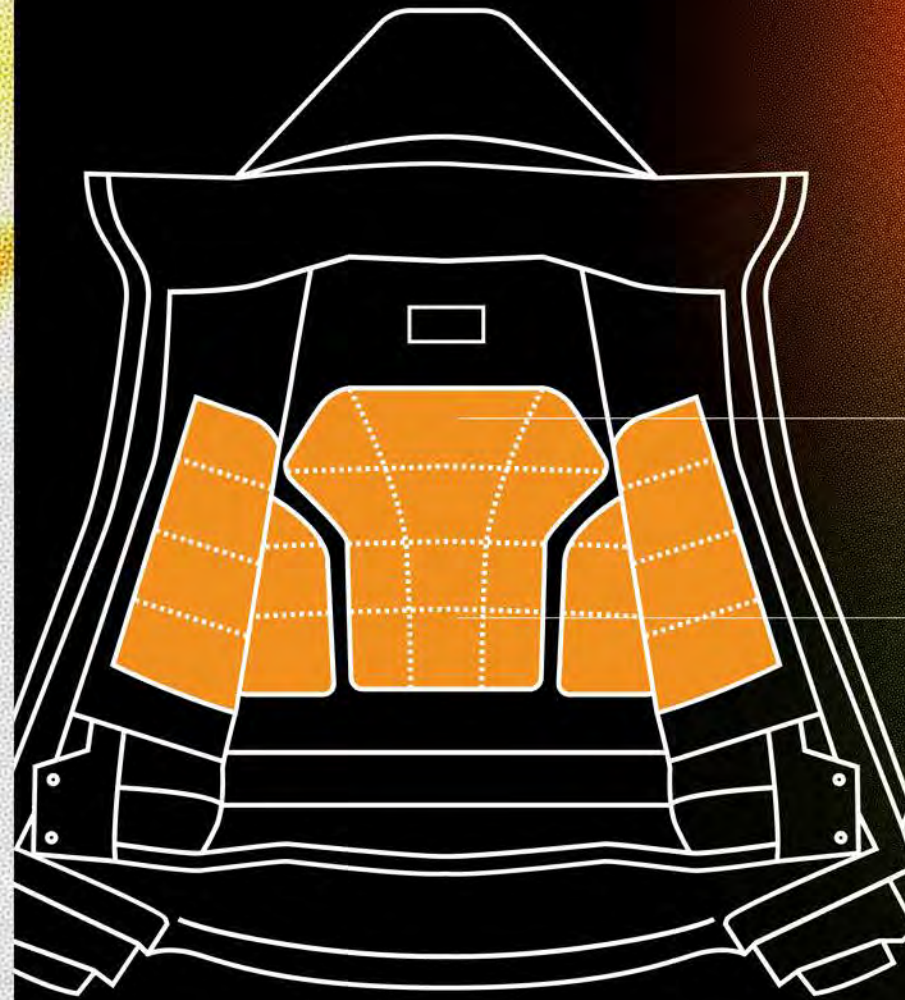

GRAPHENE THERMAL FLEECE

Graphene conducts and evenly distributes heat, keeping you warmer for longer in cold conditions while also enhancing breathability and cooling in warm weather.

THERMAGRAPH® WARM

■ STAY WARM IN THE COLDEST CONDITIONS.

686 Thermagraph Warm® offers superior warmth via body-mapped insulated panels, packed with 85% recycled infiLOFT polyfill insulation. These panels provide an all-in-one layering solution, enabling you to stay warmer while reducing the need for additional layers.

THERMAGRAPH® BODY-MAPPED LINING SYSTEM

Warmth only where you need it and maximum breathability to keep moisture out.

infiLOFT® RECYCLED INSULATION

Lightweight, moisture resistant recycled poly insulation made of circular-like filament groupings that individually retain heat and provide extra loft.

RED THREAD OF VALUE

Everything we go is based around innovation with the goal products fro out active-minded community. thirty years of progressive thinking has led us to pioneer unique features and technologies designed to enhance your experience on the resort and beyond its boundaries.

1 HOODLINK

Fold it, Roll it, Link it — Hood Link transforms your snow jacket into small size, making it easier to pack and carry.

2 PANT JACKET CONNECT™ SYSTEM

A secure five-point connection between your powder skirt and your pants to help keep snow out on the deepest of days.

3 BOOT GAITER WITH LYCRA STRETCH PANEL AND COVERED BOOT LACE HOOK

Boot gaiters cover the outside of your boot to help prevent snow from getting into your boots while skiing, snowboarding or hiking, keeping your feet dry and warm. A lycra stretch panels creates extra mobility and interior gripper elastic ensures your gaiters stay in place. Uncover the boot hook for use with snowboard boots or keep it covered during use with ski boots.

4 GLOVE LINK™ INNER THUMB GRIP

A precisely placed durable elastic loop that slips around your thumb to keep your jacket in place and the snow out on deep or stormy days.

5 PHONE HEATER POCKET

Engineered to provide an extra layer of insulation between your phone and the frigid temperatures outside so you can maximize your battery life in the elements.

8 ADJUSTABLE WRIST

No matter if you wear your jacket over or under your mitt these wrist straps will keep snow out.

6 INTERNAL GOGGLE + GOGGLE LENS+ STASH POCKET

An innovative, scratch free pocket with a dual entry to securely hold a spare goggles lens plus other accessories or gear.

7 KEY CLIP

Lose your key on the resort, hours away from your spare and you're gonna have a bad day. The Key Clip provides a simple and secure way to keep your keys and other valuables connected to you out on the mountain.

9 PASS POCKET

Never lose your pass again with a sleeve pocket located for easy access on your forearm.

MENS GORE-TEX

TECHNICAL FABRICATIONS

The seams where pieces of fabric are brought together are the most likely spot for moisture to intrude into a garment. The seam taping process prevents this by making the seams as waterproof as their surrounding fabric. Seams in 686 garments can be full taped throughout the garment or taped only at critical areas to further ensure quality workmanship and guarantee waterproofing.

The GORE-TEX membrane is created as a series of pores. Each pore is 20,000 times smaller than a water drop, yet large enough for vapor to pass through. This creates the ultimate membrane for keeping the inside of your garment dry while still allowing moisture and perspiration to pass through, effectively regulating your body temperature while keeping you comfortable inside your jacket or pants.

Not only is GORE-TEX fabric lightweight and breathable it is also guarantees you will stay dry and warm in any condition, for the life of your garment. All GORE-TEX fabrics are bluesign® approved, meeting the highest environmental standards.

MENS GLCR®

TECHNICAL FABRICATIONS

A gridded fleece mouth flap creates open air channels between insulation to increase breathability in an area around your mouth where moisture is most likely to build up. This material is designed to create a temperature regulating environment that is warm and also hyper breathable to reduce uncomfortable freezing of fabric around your chin and mouth.

Your phone is in and out of your pocket to film, meet up with friends or to find out when a chair is opening at the resort. This fleece inner pocket is designed to keep your phone tight to your body and use body heat to keep it at a temperature that will reduce battery drain on hill in the cold.

GLCR Jackets have a built in goggle pocket that holds tight to your body when you ride and mesh that allows lenses to breath and not get fogged out. An extra pocket is built in just below this pocket for a day when you need a fresh lens after you get off the lift on a wet day or fall face first into the snow.

THE HYDRA THERMAGRAPH® JACKET

FROM POWDER TO PARK, SUB-ZERO TO SPRINGTIME.

Stay warm in the coldest conditions. 686 Thermagraph® Warm offers superior warmth via body-mapped insulated panels, packed with 85% recycled infiLOFT polyfill insulation. These panels provide an all-in-one layering solution, enabling you to stay warmer while reducing the need for additional layers.

HERITAGE COLLECTION

Limited Edition Vintage 686 Reissues. The late 90's and early 2000's birthed rockstars of snowboarding — icons who's influence can still be seen in today's snowboarders and freeskiers. But just as influential was the gear of the times: Colorblocked, detailed and overly technical and animated. At the request of our team, from both youngheads to oldheads, we take a tour through our archive and unearth select pieces that helped stitch together 34 years of 686 history.

2001 LOGIC JACKET

The 2001 season was a turning point for 686 and snowboarding in general. Founder, Michael Akira West had begun spending more time in the bigger mountains of Utah and BC which in turn influenced his fascination with layering and extended use of jacketing via transformation. 686's first 3-Layer Jacket, The Logic Jacket was designed to transition from on hill to off with removable powder skirt. This blend of sportswear and technical all-mountain-wear set the standard for an era to come.

2003 ATOM JACKET

An experiment in ventilation, the 2003 Atom Jacket's design pivots around its unique shoulder vents and elbow articulation designs that added to the signature styling of a generation obsessed with progression of style. With the reissue, we kept the Atom's large oversized fit true to 2003, while we chose modern fabrics & materials that meet today's performance and sustainability standards as well as upgraded the entire lining package. The Atom is perfect for the riders out there looking to unearth the feeling of floating a simple backside rodeo or looking to provide extra room and style during high spin rotations. Due to its unique oversized fit, our team rides the Atom one size smaller than their typical jackets.

1994 LIBERTY JACKET

The first minimalist tech jacket 686 ever produced from the era of "wide everything" that was heavily inspired by the early park days at Big Bear. An era that went on to define snowboarding itself. It's a classic design and, like all the early pieces, made to pull double duty both on and off-hill. Built true to original specs we snuck the OG Jib Wear 686 M.W logo in there as a nod to the era that created us.

DOJO[®] COLLECTION

NEVER STOP MOVING FORWARD. The Atlas-tested Dojo Collection is evolved with a fit and new fabrics. A longer rise and wider cuff in the pant provides an elevated aesthetic and even greater freedom of movement. Forest hand-picked the prints and materials to bring his world from the streets to the steeps. Every detail is deliberate. Every piece is personal.

CRINKLE NYLON

A high fashion influenced performance fabric. The crinkle comes from the actual yarn itself; it's spun that way so your fabric doesn't look flat. This three-dimensional look and pronounced visual aesthetic is complemented by all the durability that makes pure nylon a favorite for outdoor gear

NYLON

The premium choice for freestylers world-wide. Nylon has a stronger molecular structure and higher abrasion resistance — creating a product that lasts longer and takes more bails than polyester. Nylon's heavier weight is a 686 team favorite, providing a sturdier drape, reducing wind-flap and more closely mimicking a true streetwear pant while riding.

CRINKLE WASH

This soft durable denim-polyester with a custom printed "wash," brings the high-street onto the snow. This unique combination of fabric makeup and print, brought to life by Forest Bailey, will wear in over time, evolving with your riding — scuffing, fading, and breaking in like your favorite pair of jeans.

TECHNICAL FABRICATIONS

The Original, Trademarked 3-in-1 Detachable Layering System. Since its inception decades ago, 686 SMARTY® 3-in-1 technology has set the integrated layering standard for the outerwear industry, adding premium versatility and value to jackets and pants. Every SMARTY® combination is specifically designed so that the shell and detachable liner work in unison to provide the ultimate experience, versatility, and value. Available in Form Jacket.

686 jackets have a built in goggle pocket that holds tight to your body when you ride and mesh that allows lenses to breath and not get fogged out. An extra pocket is built in just below this pocket for a day when you need a fresh lens after you get off the lift on a wet day or fall face first into the snow.

Nothing is more frustrating or uncomfortable than getting snow up your sleeve. A lycra wrist gaiter and a adjustable wrist gaiter will lock snow and cold out of your jacket whether you wear you jacket over or under your mitt.

WOMENS GORE-TEX

TECHNICAL FABRICATIONS

The seams where pieces of fabric are brought together are the most likely spot for moisture to intrude into a garment. The seam taping process prevents this by making the seams as waterproof as their surrounding fabric. Seams in 686 garments can be full taped throughout the garment or taped only at critical areas to further ensure quality workmanship and guarantee waterproofing.

The GORE-TEX membrane is created as a series of pores. Each pore is 20,000 times smaller than a water drop, yet large enough for vapor to pass through. This creates the ultimate membrane for keeping the inside of your garment dry while still allowing moisture and perspiration to pass through, effectively regulating your body temperature while keeping you comfortable inside your jacket or pants.

Not only is GORE-TEX fabric lightweight and breathable it is also guarantees you will stay dry and warm in any condition, for the life of your garment. All GORE-TEX fabrics are bluesign® approved, meeting the highest environmental standards.

26/27 WINTER

SIXEIGHTSIX

WOMENS GLCR[®]

TECHNICAL FABRICATIONS

A gridded fleece mouth flap creates open air channels between insulation to increase breathability in an area around your mouth where moisture is most likely to build up. This material is designed to create a temperature regulating environment that is warm and also hyper breathable to reduce uncomfortable freezing of fabric around your chin and mouth.

Your phone is in and out of your pocket to film, meet up with friends or to find out when a chair is opening at the resort. This fleece inner pocket is designed to keep your phone tight to your body and use body heat to keep it at a temperature that will reduce battery drain on hill in the cold.

GLCR Jackets have a built in goggle pocket that holds tight to your body when you ride and mesh that allows lenses to breath and not get fogged out. An extra pocket is built in just below this pocket for a day when you need a fresh lens after you get off the lift on a wet day or fall face first into the snow.

HERITAGE COLLECTION

Limited Edition Vintage 686 Reissues. The late 90's and early 2000's birthed rockstars of snowboarding — icons who's influence can still be seen in today's snowboarders and freeskiers. But just as influential was the gear of the times: Colorblocked, detailed and overly technical and animated. At the request of our team, from both youngheads to oldheads, we take a tour through our archive and unearth select pieces that helped stitch together 34 years of 686 history.

TECHNICAL FABRICATIONS

The Original, Trademarked 3-in-1 Detachable Layering System. Since its inception decades ago, 686 SMARTY® 3-in-1 technology has set the integrated layering standard for the outerwear industry, adding premium versatility and value to jackets and pants. Every SMARTY® combination is specifically designed so that the shell and detachable liner work in unison to provide the ultimate experience, versatility, and value. Available in Form Jacket.

686 jackets have a built in goggle pocket that holds tight to your body when you ride and mesh that allows lenses to breath and not get fogged out. An extra pocket is built in just below this pocket for a day when you need a fresh lens after you get off the lift on a wet day or fall face first into the snow.

Nothing is more frustrating or uncomfortable than getting snow up your sleeve. A lycra wrist gaiter and a adjustable wrist gaiter will lock snow and cold out of your jacket whether you wear you jacket over or under your mitt.

The image displays two Fox Racing gloves. The glove on the left is primarily black with teal checkered accents on the fingers and palm. It features a blue fox head logo on the back of the hand and a black strap with a buckle at the wrist. The glove on the right is black with a teal and black abstract, marbled pattern on the palm and fingers. It also has a black strap with a buckle at the wrist. Both gloves have a black wristband.

YOUTH EVOLUTION

686 YOUTH EVOLUTION ALLOWS JACKETS AND PANTS TO GROW ALONG WITH THE YOUTH AS THEY SPROUT. TWO EASY STEPS ALLOW JACKETS AND PANTS TO GROW UP TO A FULL SIZE TO KEEP GROMS GOING STRONG, MULTIPLE SEASONS IN A ROW.

1. Turn jacket or pant inside out.

2. Find red threading on wrist or ankle.

3. Carefully cut red thread around entire wrist or ankle.

4. Once red threading is removed wrist or ankle will extend.

5. Jacket or pant length will extend 1.5" longer.
