DREAM BOARDS - SKI

Innovation, creation and dream realization. The 26/27 Lib ski line brings patented ice slicing serrated edges, plant based bio plastic topsheets, sustainably harvested wood cores, UHMW sidewalls, eco sublimated graphics on refined geometries and contours.

Handcrafted in the USA, environmentally nicer and zero hazardous waste never looked better.

MAGNE-TRACTION® EFFORTLESS EDGEHOLD {PATENT #7823892 #8511704}

SERRATED STEAK KNIFE TECHNOLOGY TURNS ICE INTO POWDER!

Pioneered by Lib Tech, our patented Magne-Traction® serrated edge technology increases edge hold power and makes our skis feel 10mm narrower on hardpack allowing you to push your skiing to new levels. Magne-Traction® reduces fatigue, builds confidence and makes skiing easier. For Lucas, you and the crew that means high performance, more fun and no limits progression.

MAGNE-TRACTION JIB ADVANTAGE:

Detune your skis for metal, plastic and cement and still get great edge hold all over the mountain.

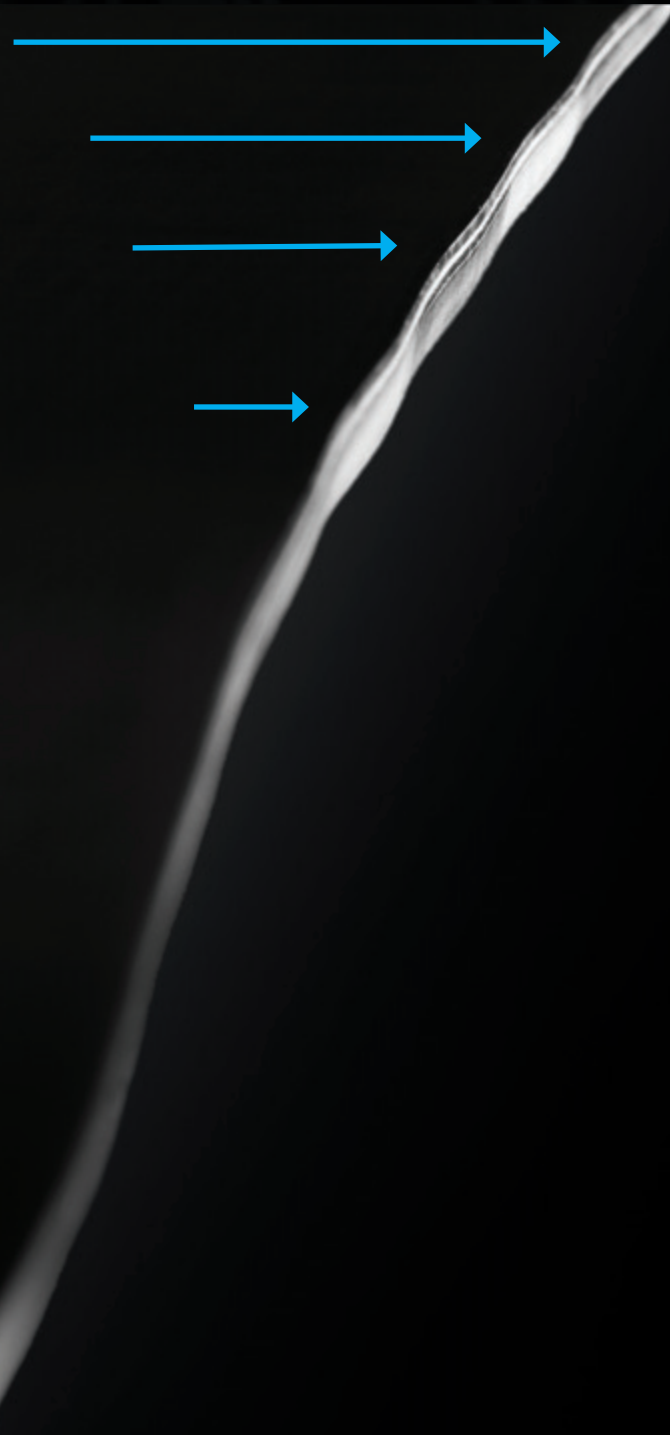

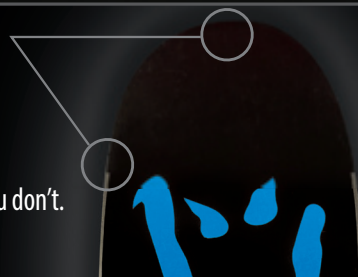

INTELLIGENT DESIGN

BUILT-IN PERFORMANCE AND DURABILITY

LOW SWING WEIGHT:

No unnecessary heavy metal in the tips and tails. Steel where you need it, not where you don't.

MERVIN 360° PERIMETER PROTECTION IMPACT DEFLECTOR SYSTEM

ECO LIGHT CONSTRUCTIONS

H-POP HEMLOCK ECO LIGHT (BACKWARDS/PROTEEN)

ART BY: Seamus Trueb

LIB TECH

ARTIST Q & A

SEAMUS TRUEB

Ever since I was a kid, I have had a creative outlook in life that I continue to express through many different avenues, from drawing and painting to playing music and skiing. When I was young, I would sketch ideas for ski graphics, and I am beyond psyched to have that dream come true. 10-year-old me would be freaking out if you told him that his art would be on a pair of skis. I have always pulled inspiration from nature, along with street art, ski and snowboard culture, and skate culture. I try to emulate the things that I think are sick, but in my own way. with my own style.

- SEAMUS

Hi Seamus, Ryan [Davis, NW Lib Tech Rep] here, I'm super stoked to hear you got one of your graphics on Lib Skis! How did you get introduced to Lib?

In middle school, I met one of my best friends, Kailani Lauderdale, whose family opened my eyes to the core culture of skiing and snowboarding at Mt. Baker, and at the heart of that was Mervin and Lib.

I notice you are always ripping around Baker with a few skiers but also snowboarders... did you ever feel a division there? Maybe you can explain your crew and how you all became friends...

My crew is the best. I met them all in high school, where we all gravitated to each other because we all shared the same deep passion for playing in the snow. It was never even a thought whether you had two sticks on your feet or just one, and there was never a division between the two. The only thing that mattered was if you ripped and could keep up.

Applying art to skis isn't always the main focus of a ski brand, but Mervin has always applied art to their snowboards and skis... it really is a cool and unique platform for the artist. Can you explain what it means to you as a skier and an artist to have this opportunity?

As a skier, it's the dream canvas. For me, the graphic on the skis I ride is a way I can express myself, just like picking out a certain jacket or shoes to wear. And to have the opportunity to put my art on a pair of skis that I can then express myself by riding is so sick. And I hope that others can have that same sense of self-expression by riding them as well.

Where does your creative side come from and how did it develop?

I was lucky enough to go to the Waldorf school from kindergarten to 8th grade, where the curriculum is focused on creativity. So from a very young age, I was taught a creative outlook in all areas of life, which I just took and ran with.

Lib Tech is known for its snowboards and manufacturing in Washington State. What's your take on a snowboard brand making skis?

Honestly, I have always been more inspired and resonated more with snowboarding and its culture than ski culture, and maybe that's just because I grew up in one of the main hubs for core snowboarding. But regardless,

SEAMUS TRUEB - CONTINUED

the fact that Lib makes skis allows me to be able to be a part of something that I find rad and resonate with, even if I'm riding skis and not a snowboard.

What does a perfect day look like in your world?

My perfect day would definitely be a pow day at Mt. Baker, riding the Shucksan Arm with my friends. Then stopping at Gunners for some burnt ends on the way home to relaxing, soaking in a hot tub, and playing some music.

I've known you for a while now and have watched you turn into a fine young man. You must have some good influences in your life? Care to share any details?

I would definitely need to give credit to my parents and my older brother. They all helped to instill a good, strong set of core values that I try my best to live by.

Can you tell us anything about your art and what inspired you?

My art comes in all shapes and sizes. I bounce around from many different creative outlets and just do whatever it is that has me inspired. As for inspirations, I draw a lot from street art and cartoons, and also skate culture and music. I have started to develop my own style, which has morphed into a form of abstract line art that I think is pretty unique, and I really enjoy.

Thanks Seamus! In my role at Mervin I feel like I have to ask a lot of favors from those in my tight circle. You are one of those people that is always helping out and going beyond the call of duty. You must have good parents and people around you. I really noticed what kind of person you were when I asked you multiple times to come work at the Coal Pad. You grabbed the sledge hammer and busted concrete for hours, you cleaned tools and you worked next to gnarly concrete tradesmen... always smiling and never leaving before the job was done. I have top level respect for you... and you are pretty good on a skateboard for a skier. The world is your oyster. 🍷

LIBSTICK 103

ALL MOUNTAIN - EVERYWHERE

- THE ULTIMATE FREERIDE SKI
- LIGHTWEIGHT ASPEN: NATURE'S FIBERGLASS
- EARLY RISE TIP AND TAIL AND MAGNE-TRACTION®

TERRAIN PARK RESORT BACKCOUNTRY **SKIER LEVEL:** DAY 1 INTERMEDIATE ADVANCED **FLEX:** SOFT MEDIUM FIRM

ALL MOUNTAIN EVERYWHERE. The Libstick 103 is a perfect soft snow minded all terrain width that creates the go anywhere and everywhere ski. A playful early rise tip and tail combined with a lightweight aspen core, and women's specific forward mounting location and medium/firm flexing body plus Magne-Traction® serrated edge power technology combine to create an amazing versatile resort ski that is ready to rip pow and tear through variable conditions with ease and confidence. The Libstick 103 is the perfect combination of being light and easy with great overall performance, stability and edge hold to allow you to ski anywhere you want to go.

MAGNE-TRACTION® EFFORTLESS EDGE HOLD

SERRATED STEAK KNIFE TECHNOLOGY

MAGNE-TRACTION® JIB ADVANTAGE:
Detune your skis for metal, plastic and cement and still get great edge hold all over the mountain.
