Season Twenty-Two

YEAR: 2026/27

“Status quo” is a dirty word at Union Binding Company. We believe that if you aren’t moving forward, you’re falling behind. As a manufacturer, a brand, and a part of the snowboarding community, our strength is our dedication and expertise. By redefining the connection between rider and board, we transform the snowboarding experience.

Transformation is what Union is all about. We’ve grown from a small core snowboarding brand to the global leader in snowboard bindings by focusing on the details—pioneering lightweight materials, designing products built to withstand freezing conditions, and refining every gram, every connection, and every detail. Entering a new era with Union Boot Division, that same dedication now drives the creation of the world’s most advanced snowboard boots. It’s not about being the biggest brand, it’s about being the best brand.

Everything at Union comes down to focus and dedication. Our “STRONGER” motto defines not only our products, but every part of the company. From delivery, sales, and customer service to the best Pro Team in snowboarding, our friendships, and our genuine approach—we are committed to transforming the snowboarding experience. And today, as a certified B Corporation, we hold ourselves to even higher standards, ensuring our impact on people, communities, and the planet is as strong as our product.

Designed, Tested, and Engineered in Italy

LOCATION: COLICO, IT / MONTEBELLUNA, IT

Union's strength comes from two world-class innovation centers in Italy: The Box, in the heart of the Alps, where ideas meet the mountains and prototypes are tested on snow in real time; and Montebelluna, the global epicenter of alpine footwear craftsmanship, where Union Boot Division controls every step of design, materials, prototyping, and supply chain.

2 100%

INNOVATION CENTERS

CONTROL OF THE PROCESS

Shaping the Future Through Innovation

LOCATION: THE BOX – UNION LAB

Innovation drives everything we do at Union. We push past limits with new materials, advanced processes, and bold ideas that redefine what snowboard gear can be. From forged carbon to rapid prototyping, our in-house teams design, test, and refine until we set the standard for performance and durability.

Source FC

Unisex Snowboard Binding

Product Description

The connection between rider and snowboard has never been closer. We removed the mounting disk, reduced the baseplate height, and cut hundreds of grams of excess weight. The result completely changes how your energy transfers from body to board. The Union Source FC puts you in the driver's seat. Are you ready for the ride?

Source

Unisex Snowboard Binding

Product Description

The Union Source delivers a balanced ride for snowboarders who want dependable performance without the aggressive feel of the Source FC or Source Pro. A more forgiving highback, wider ankle straps, and a nylon baseplate create a setup that's comfortable, supportive, and still keeps the close connection to the snowboard.

Explorer

Unisex Splitboard Binding

Product Description

When splitboard bindings feel just like your regular setup, the descent becomes the best part of the tour. The Union Explorer is designed for beginner to intermediate splitboarders who want a smooth, responsive ride without overcomplication. Built for durability, simplicity, and natural board feel, it handles long tours, steep lines, and everything in between.

SHELL

● Single Frame Shell™

WEIGHT:	218 G
MATERIAL:	PEBAX®

Engineered with Pebax®, this lightweight and durable shell offers waterproof protection and consistent flex that holds up through the full life of the boot.

FEATURED ON: [ALL MODELS](#)

LINER

● Forma Pro Liner w/ TrueFoam™ Technology

WEIGHT:	350 G
MATERIAL:	MEMORY FOAM

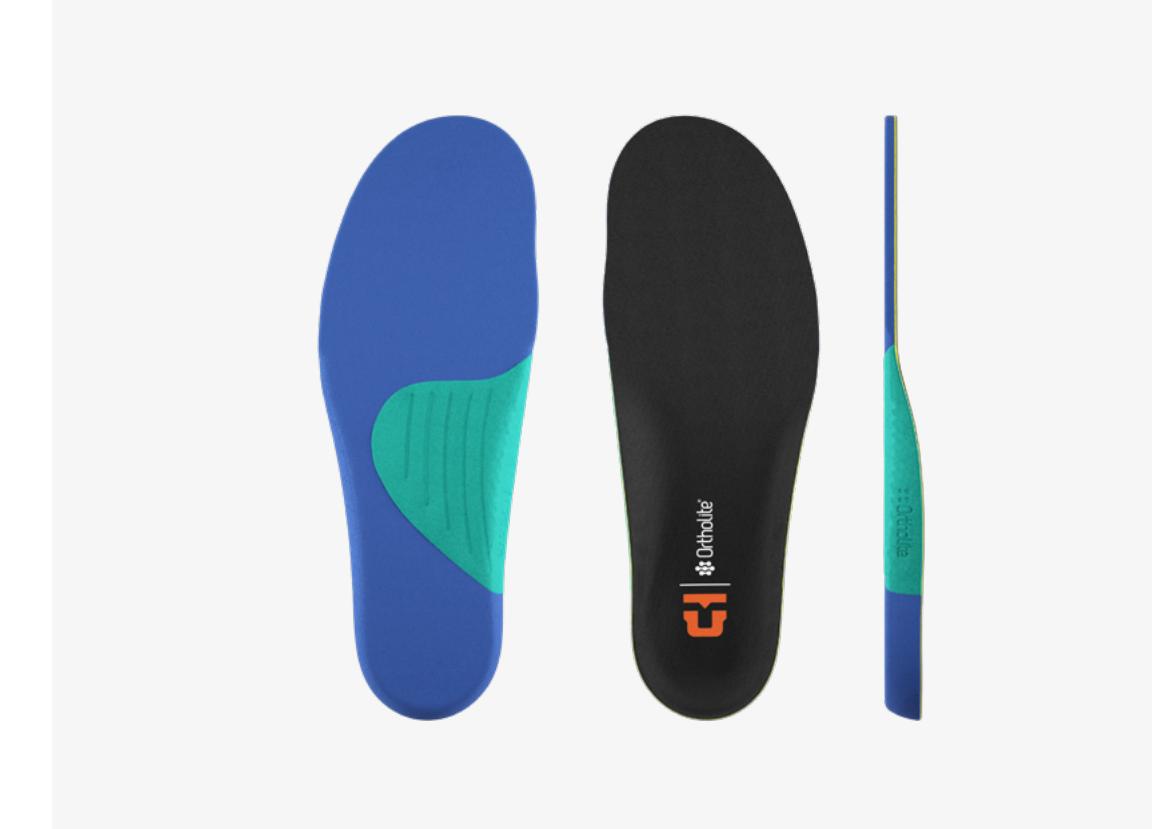

This custom-built memory foam liner features TrueFoam™ Technology, molding to any foot right out of the box—no break-in, no pack out, just lasting comfort.

FEATURED ON: [ALL MODELS](#)

FOOTBED

● Contact Footbed

WEIGHT:	50 G
MATERIAL:	DUAL-DENSITY ORTHOLITE™

3D-formed dual-density Ortholite™ footbeds with 5% recycled rubber provide lasting comfort, impact absorption, and performance ride after ride.

FEATURED ON: [ALL MODELS](#)

BUSHING

● Rebound Bushing™

WEIGHT:	15 G
MATERIAL:	E-TPU

A responsive layer of rebounding foam under the heel and toe absorbs impacts, reduces vibrations, and fights foot fatigue without ever losing shape.

Boot Soles

OUTSOLES / MIDSOLES

❶ Vibram® XS Trek Evo Outsole

NEW

WEIGHT:	83 G
MATERIAL:	VIBRAM® RUBBER COMPOUND

Engineered for stability, comfort, and durability. With multisurface grip, Traction Lugs, and premium rubber compounds, this outsole delivers confident traction on snow, ice, and hard terrain, season after season.

FEATURED ON: RESET PRO

❷ Vibram® SD Midsole

NEW

WEIGHT:	78 G
MATERIAL:	PHYLON EVA

Engineered by Vibram®, the SD midsole fuses lightweight EVA with shock-dispersion tech, delivering durable cushioning and high energy return for performance that lasts.

FEATURED ON: RESET PRO

❸ X-Grip Outsole

WEIGHT:	98 G
MATERIAL:	NATURAL RUBBER

High-performance natural rubber in a thin-profile design maximizes board feel and responsiveness while delivering durable traction on snow and ice.

❹ Phylon EVA Midsole

WEIGHT:	92 G
MATERIAL:	PHYLON EVA

Phylon EVA foam offers consistent cushioning and impact absorption underfoot, keeping every step soft, responsive, and comfortably lightweight.

Boot Lacing Systems

LACING SYSTEMS

➊ Dual Zone BOA® Ft. H4 Coiler + H4

BOA® FIT SYSTEM:	H4
LACE MATERIAL:	BOA® TX3 LACE

Engineered for maximum power and durability, the H4 Coiler drives upper-zone flex and stability with unmatched strength, while the H4 remote dial secures the forefoot for rapid response. It's precision you can trust in the harshest conditions.

H4

FEATURED ON:

RESET PRO

UNION INNOVATION + SUPPORT

➋ Dual Zone BOA® Ft. H4 Coiler + M2

BOA® FIT SYSTEM:	M2
LACE MATERIAL:	BOA® TX3 LACE

Smooth and reliable, the H4 Coiler fine-tunes upper-zone flex and stability with ease, while the M2 remote dial locks in the forefoot for consistent response. Dependable and versatile, it delivers lasting comfort and control across a wide range of riding conditions.

M+2

FEATURED ON:

➌ Traditional Lace

LENGTH:	200 CM, 230 CM
LACE MATERIAL:	RECYCLED POLYESTER

It doesn't get more classic than traditional laces. Adjust tightness across the entire boot for personalized support, flex, and comfort on every run.

FEATURED ON:

FACTORY

Boot Features

HEEL HOLD

● Quick-Lock Harness + Ankle Pockets

WEIGHT: -

MATERIAL: MIXED

Quick-Lock Lace Harness [01] and Ankle Pockets with TrueFoam™ Technology [02] work together to lock the heel, distribute pressure evenly, and provide stable ankle support for precise control on every turn.

HEAT + MOISTURE

● PrimaLoft® Insulation + Mesh Liner

WEIGHT: -

MATERIAL: PRIMALOFT® GOLD

PrimaLoft® insulation traps heat to keep feet warm without bulk, while moisture-wicking linings pull sweat away to keep them dry and comfortable. Together, they keep feet ready for long, back-to-back days on snow.

FEATURED ON:

ALL MODELS

MATERIALS

● HF Premium Synthetics

WEIGHT: -

MATERIAL: RIPSTOP, MICROFIBER

HF Premium Synthetic materials are wear-resistant and welded for long-lasting durability, providing reliable performance ride after ride.

FEATURED ON:

ALL MODELS

FLEX

● Removable Power Strap + Lace Lock

NEW

WEIGHT: -

MATERIAL: MIXED

The Power Strap [01] locks in the upper foot for flex, energy transfer, and responsive board feel, while the Lace Lock [02] boosts heel hold and reduces lift. The Power Strap is removable, so you can ride with or without it.

Binding Innovation

SOURCE PRO TH

❶ S10 Halo Duraflex CB Baseplate w/ FC Core

WEIGHT: 240 G

MATERIAL: FORGED CARBON, DURAFLEX CB NYLON

Two-layer baseplate construction pairs an ultra-lightweight Forged Carbon Core with a Duraflex CB Frame, delivering maximum strength, response, and board feel in the lightest baseplate Union has ever built.

❷ Direct Connect Mounting System

WEIGHT: 36 G

MATERIAL: GRADE 8.8 STEEL, ALUMINUM

A disk-free mounting system using just two screws and washers, reducing weight while providing strong, responsive energy transfer from rider to snowboard.

❸ S18 Source TH Duraflex Blue Highback

NEW

WEIGHT: 141 G

MATERIAL: DURAFLEX BLUE NYLON

Asymmetrical freeride wrap design delivers targeted support and board response. The integrated 3-stage forward lean adjustment allows riders to fine-tune their stance for maximum control in any terrain.

❹ Hybrid 3.0 Ankle Strap w/ HP Core

NEW

WEIGHT: 69 G

MATERIAL: HYTREL, HOT PRESS EVA

Lightweight and responsive, the Hybrid 3.0 ankle strap features a hot-press EVA core for cushioning and comfort. Its all-new hinge connector makes getting in and out of the binding effortless.

Binding Innovation

NEO

❶ S14 Duraflex CB Baseplate

NEW

WEIGHT: 250 G

MATERIAL: DURAFLEX CB NYLON

Three-piece baseplate construction with a mini disk design provides true board flex and more lateral freedom for natural feel. Each piece can be engineered from different materials in the future to fine-tune ride characteristics.

❷ Vaporlite HD 2.0 / Hi-Flex HP EVA Bushing

NEW

WEIGHT: 122 G

MATERIAL: TPR, HOT PRESS EVA

Two-piece oversized bushing design pairs a dense, rubbery TPR rear bushing for vibration damping with a Hot Press EVA front bushing for cushioning and shock absorption.

❸ S24 Duraflex CB Highback

NEW

WEIGHT: 131 G

MATERIAL: DURAFLEX CB NYLON

Asymmetrical freeride design with four-piece construction delivers targeted support and response. Integrated 2-stage forward lean adjustment lets riders fine-tune their stance for precise edge-to-edge control.

❹ Hybrid 3.0 Ankle Strap w/ HP Core

NEW

WEIGHT: 69 G

MATERIAL: HYTREL, HOT PRESS EVA

Lightweight and responsive, the Hybrid 3.0 ankle strap features a hot-press EVA core for cushioning and comfort. Its all-new hinge connector makes getting in and out of the binding effortless.

Binding Innovation

ATLAS PRO STEP ON®

① S1 Step On® Duraflex CB Baseplate

WEIGHT:	310 G
MATERIAL:	DURAFLEX CB NYLON

Engineered for unmatched durability, this baseplate is designed and manufactured by Union to deliver long-lasting performance. Backed by a lifetime warranty for peace of mind season after season.

② Drive Frame Hi-Flex EVA Bushing

WEIGHT:	63 G
MATERIAL:	DURAFLEX CB NYLON, HI-FLEX EVA

Exclusive to the Atlas Pro Step On®, the Drive Frame Hi-Flex EVA bushing combines a rigid nylon frame with precision-engineered damping to increase stiffness and underfoot response, delivering a more connected, powerful ride without sacrificing comfort.

③ Step On® Instant Connection™ System

WEIGHT:	65 G
MATERIAL:	POM, ALUMINUM

Innovative boot-to-binding connection point provides instant heel-to-toe response. The system maximizes convenience and performance, making it faster and easier to get in and out of the binding without compromising control.

④ S1 Step On® Pro Forged Hybrid Highback

WEIGHT:	220 G
MATERIAL:	FORGED CARBON, DURAFLEX CB NYLON

Stiff and responsive forged carbon spine delivers maximum board control, while the Duraflex CB nylon construction ensures long-lasting durability. Increased forward lean provides faster edge-to-edge response for quick, precise turns.

Binding Innovation

CONTACT

① S6 Duraflex Baseplate

WEIGHT:	250 G
MATERIAL:	DURAFLEX NYLON

Mini disk baseplate design provides true board flex with a mid-stiff ride feel, perfect for park or all-mountain riding.

② HP EVA Bushing + Non-Stick HP EVA Footbed

WEIGHT:	70 G
MATERIAL:	EVA

High-performance bushing and custom-contoured footbed deliver cushioning, shock absorption, and dampening underfoot for consistent comfort and board control.

③ S3 Asym Duraflex Highback

WEIGHT:	166 G
MATERIAL:	DURAFLEX NYLON

Asymmetrical freestyle flex pattern offers targeted support and natural response. Cam-Lock forward lean adjustment lets riders fine-tune their stance for precise edge-to-edge control.

④ Exoframe 3.0 Ankle + 1.0 Ultra Grip Toe Straps

WEIGHT:	100 G
MATERIAL:	HYTREL, THERMOPLASTIC RUBBER

Lightweight and durable ankle straps provide a secure, locked-in ride feel with easy adjustability, while thermo-plastic toe straps offer multi-positional options and compatibility with all boots for reliable board connection.

Binding Material Glossary

PLASTICS / COMPOSITES	FORGED CARBON	BUSHINGS	STRAPS
<p>Duraflex XC Union's newest, most high-end nylon. Super lightweight, stiff, and ultra-responsive, Duraflex XC sets a new benchmark for performance in Union bindings and is partially made from steamed castor bean oil.</p> <p>Duraflex Blue Made with 90% sustainable raw materials and audited by ISCC and TÜV NORD, Duraflex Blue is Union's first partially sustainable nylon created from a mass-balance feedstock.</p> <p>Duraflex CB Featuring the highest fiberglass content in Union's lineup, Duraflex CB is lighter, stiffer, and more responsive than Duraflex ST, delivering precise performance for advanced riders.</p> <p>Duraflex ST A high-fiberglass version of Duraflex, offering extra response without added weight. Designed for consistent performance in cold temperatures.</p> <p>Duraflex Formulated to maintain consistent flex across a wide range of cold temperatures, Duraflex is exclusive to Union for snow hardgoods.</p>	<p>Forged Carbon Exclusive to Union, Forged Carbon exceeds the strength of injected plastic tenfold and is the only carbon material that can be truly 3D-formed, enabling ultra-lightweight, high-performance components.</p> <p>METALS</p> <p>Extruded Aluminum 100% pure aluminum that maintains its true shape under heavy wear and tear, providing durable, lightweight performance.</p> <p>Magnesium Union-exclusive magnesium process produces a material four times stronger than aluminum at half the weight, offering superior strength-to-weight ratio.</p> <p>Grade 8.8 Steel The strongest steel commonly available, used in critical binding components to deliver unmatched strength and reliability.</p> <p>Titanium Lightweight, high-strength, and corrosion-resistant metal, used selectively in hardware for peak performance and durability.</p>	<p>Hi-Flex HP EVA Hot-press EVA material engineered for high performance. Delivers consistent cushioning, shock absorption, and responsive rebound underfoot while maintaining shape over time. Exclusive to Union bindings.</p> <p>Vaporlite HD 2.0 Higher-density version of Vaporlite, offering enhanced durability and responsiveness while retaining superior vibration dampening properties.</p> <p>Molecular More durable and cushioned than traditional thermoformed EVA, Molecular acts as a suspension system between the baseplate and snowboard topsheet, reducing vibrations on harsh snow.</p> <p>OTE Fused Vaporlite 2.0 "Over-the-Edge" Fused Vaporlite 2.0 is 20% lighter than the original while remaining waterproof, durable, and vibration-dampening, providing a smooth and natural board flex.</p> <p>HP EVA (Hot Press) Standard hot-press EVA cushioning for reliable shock absorption and underfoot comfort, engineered to maintain shape over time.</p> <p>Thermoformed EVA Classic thermoformed EVA designed to save heels and promote true, even board flex with effective shock absorption.</p>	<p>Hytrel Combines the flexibility of rubber with the strength and processability of thermoplastics for durable, responsive straps.</p> <p>Lycra Layered EVA Lightweight and durable, this layered EVA conforms to any boot make or model for a comfortable, custom fit.</p> <p>PU Layered EVA Waterproof, super-durable layered EVA that molds to any boot for reliable support and performance.</p> <p>Hot-Press EVA Engineered for cushioning and comfort underfoot, maintaining shape and performance over time.</p> <p>S.E.B.S. Thermoplastic anti-slip rubber webbing that keeps boots secure and locked in for precise control.</p> <p>**WEIGHT DISCLAIMER</p>
			<p>**All listed binding weights are based on a size M full pair, including disks and hardware. Actual product weight may vary by ±1%, and slight differences can occur between colorways.</p>

THE UNION GUARANTEE

Union is proud to use the highest-grade materials available on every single product that we produce. Wherever you see the "U" logo, you can have the confidence that no sacrifices have been made.

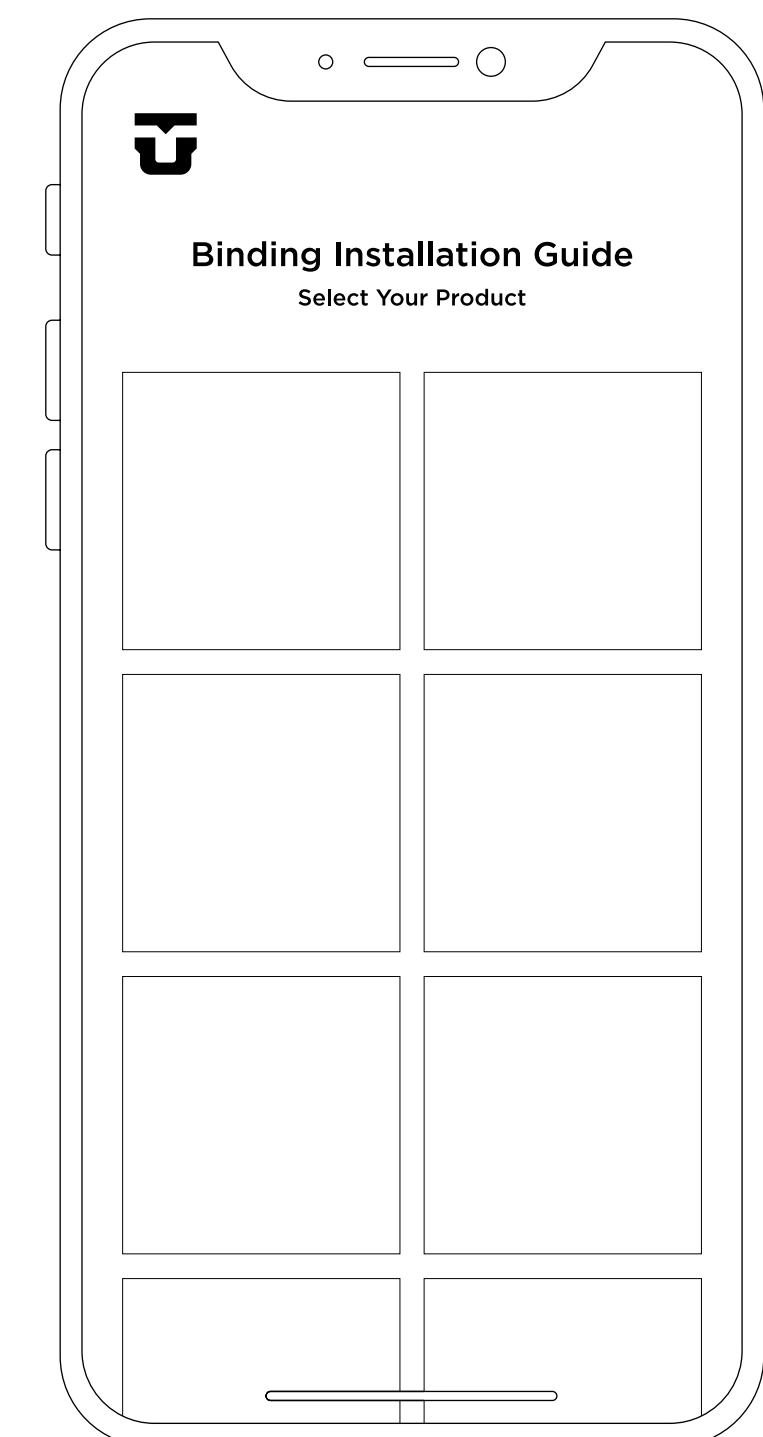

All Union products are covered against defects in materials or workmanship for one year from the date of purchase (two-year coverage in EU). Binding baseplates and heelcups are covered for the lifetime of the product.

Installation Guide

DIGITAL ACCESS

Setting up bindings just got even easier. The Union digital installation guide is a step-by-step online guide to help customers get the perfect boot-to-binding fit everytime.
