REDEFINING BACKCOUNTRY SNOWBOARDING

SPARK FUSION

black
BC 572401-1000/9110

It's time to reimagine what's possible with the Spark Fusion. It features a significantly smaller footprint and a design optimized for skinning, hiking, and riding. To ensure it can withstand the harshest conditions, the Spark Fusion features our proven Rock Guard and a snow shield to protect the boot from rocks, ice, and moisture. The boot's Backcountry liner provides a truly custom fit and sports a flexible toe box that offers a precise yet forgiving feel. For even greater comfort and control, the Spark Fusion uses our L3 lacing system with speed lacing to cradle the foot and calf, and it features the BOA® Fit System to lock down the ankle and heel. Thanks to this zonal fit, you can lock your ankle and forefoot in place while allowing your leg to move within the boot when ascending. For unrivaled traction, the Spark Fusion also boasts a Vibram Eastridge sole. The Spark Fusion also boasts a Vibram Eastridge sole. The boot's plastic backwelt features a grooved heel for accommodating semi-automatic crampons. The Spark Fusion redefines what backcountry snowboarding can be.

X-PLORER

gravity green

CTF 572506-1000/4215 S4 572505-1000/4215

The best turns are the ones you earn. And when it's time to break trail, the X-plorer gives you exceptional support for both the way up and the ride down. Combining the best of both worlds, its traditional laces offer a classic ride and clean appearance while the boot's BOA® Fit System allows you to quickly and effortlessly attain a precise fit in the heel and ankle area. And for superior traction on cold and icy surfaces, the boot sports a Vibram Eastridge sole. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. Whether venturing to new peaks or just your backyard, stake your claim with the X-plorer.

STALE PRO

pine

CTF 572609-1000/1052 S3 572608-1000/1052

Ståle Sandbech needs no introduction. From dominating Slopestyle and Big Air contests to bringing his unique style to the backcountry—he's done it all. Most recently, he turned heads by winning Natural Selection as a rookie on the tour. Ståle joined forces with DEELUXE in search of the perfect boot—and together we built it to his exact specs. The Ståle Pro, his first-ever signature model, is as versatile as he is. Drawing inspiration from his favorite DEELUXE team model, the Deemon Pro, this boot is built to work in any terrain. It features a Vibram Eastridge sole for unrivaled traction when hiking, a Snow Shield to protect the lower boot from snow, ice, and moisture, and a custom Sled Guard designed at Ståle's request. Of course, the boot comes factory-tuned with Rapid React Modular Technology for lightning-fast response. Get ready to take on any terrain with the Ståle Pro.

THE PERFECT BOOT, NO MATTER WHERE THE TERRAIN TAKES YOU

NOMAD

cappuccino

CTF 572616-1000/3001 S3 572615-1000/3001

Introducing the Nomad – the snowboard boot for riders who are always searching for the perfect turn. Made from high-quality materials to withstand ever-changing conditions, this boot excels no matter where the terrain leads. A specially designed overlap construction on the arch ensures a snug fit, delivering optimal comfort and performance, regardless of foot width. The Nomad features a fully customizable BOA® Fit System with a proprietary configuration found exclusively on select DEELUXE models. To further enhance the responsiveness of your boot, it's equipped with a loop to accommodate an optional Power Strap. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. Whether carving down the slopes or hiking through deep powder, this boot provides the performance you need. Crafted with precision, built for the bold, and ready to take on any challenge.

CLASSIC APPEARANCE MEETS SOPHISTICATED TECHNOLOGY

AREth RIN

white sage
S3 572640-1000/1413

ABOUT AREth

Since 2001, AREth has quietly forged its own path in Japan—and beyond. Guided by a deep commitment to clean design, the brand has earned a reputation for crafting footwear that's as authentic as it is original. And with a down-to-earth approach, AREth inspires others to live bravely and creatively.

Whether it's a crisp method, a fresh pow slash, or a creative line through the trees, the best riding comes from the soul. United by this belief, DEELUXE and AREth have teamed up to create the AREth Rin. Armed with a classic appearance, it pairs clean design with rich materials and sophisticated technology. And thanks to its ability to ride any terrain, it's Kazu Kokubo's boot of choice. Combining the best of both worlds, its traditional laces offer a timeless look and familiar feel while the boot's BOA® Fit System allows you to quickly and effortlessly secure your ankle and heel. A rugged leather patch in the ankle zone enhances comfort and durability while further securing your foot. The boot's Stage 3 liner provides a truly custom fit while its Skate Flex sole offers unsurpassed boardfeel. Inspired by the boot's refined design and impressive performance, Japan's Freerun magazine recently honored the AREth Rin as one of the top picks in the freeride category of its Best Gear Awards. If your riding comes from within, consider the AREth Rin your soulmate.

When you're ready to take your riding to the next level, the ID Lite is your go-to boot for every session. Rounding out our renowned ID series, it delivers top-tier performance in a sleek, lightweight design. Updated with the BOA® Fit System, it cradles the contours of your foot for exceptional comfort and response. To further enhance the responsiveness of your boot, it's equipped with a loop to accommodate an optional Power Strap.

The ID Lite's Pro Flex construction strikes the ideal balance between flex and stability, while its Skate Flex sole ensures unmatched board feel and precision. Equipped with the Stage 2 liner and Jib Tongue, this boot offers the perfect blend of responsive flex and all-day comfort, making it the ultimate choice for riders who demand both progression and reliability. Step into the ID Lite and experience the ideal balance of performance, durability, and everyday versatility.

DNA

rose
S2 572675-1000/1542

With a look and feel inspired by a trusted pair of sneakers, the DNA has quickly emerged as a favorite among riders who spend their days jibbing and lapping the park. With a slightly softer flex, the DNA pairs out-of-the-box comfort with all the features you need for a great day slaying the slopes or hitting kickers and rails. Combining the best of both worlds, its Traditional Lacing offers a classic ride and clean appearance, and the BOA® Fit System allows for a quick, precise fit in the heel and ankle area. A Snow Shield protects the lower part of the boot from snow, keeping your feet dry, while strategically placed lace webbings allow you to tighten the laces more precisely and securely. The especially thin, deconstructed-style Jib Tongue is paired with a grippy Skate Flex sole to maximize board feel and responsiveness. Thanks to its Stage 2 liner, the boot delivers an impressive ride from day one. The only downside? The DNA is so comfortable you might forget you're wearing it long after you step off the snow.

THE PERFECT BOOT, NO MATTER WHERE THE TERRAIN TAKES YOU

NOMAD WMN

pink! wink!
S3F 572615-2000/1412

Introducing the Nomad WMN – the snowboard boot for riders chasing the perfect turn. Designed by women for women, it combines thoughtful, women-specific performance features with exceptional attention to detail. A specially designed arch overlap ensures a snug, comfortable fit for all foot widths, while the fully customizable BOA® Fit System delivers precise, responsive control. The Nomad WMN is equipped with the new Stage 3F Liner, made from plush, cozy materials for a snug fit and warm, comfortable feet, while its carefully designed shape provides extra space in the calf area for optimal fit. Built from high-quality materials, the boot excels across all terrains, from groomed runs to deep powder. Its shell uses Rise by Bloom, a bio-based foam derived from algae that helps sequester carbon, clean water, and restore aquatic ecosystems. Crafted with precision, built for the bold, and ready to tackle any challenge.

ID WMN

essential black

S3 572545-2000/9081

Introducing the ID WMN, a snowboard boot that needs no introduction. The boot that's more than just footwear—it's a legend. Celebrating more than 20 years of innovation and excellence, the ID WMN has become an iconic staple in the snowboarding world. The newest edition of the ID WMN stays true to its roots, embodying the classic elements that made it a favorite, while embracing modern enhancements that elevate its performance. For exceptional board feel, the ID WMN features our tried and tested Quantum sole. This sole provides an especially direct and responsive ride while also offering strategic cushioning to dampen vibrations and absorb impact energy. The Double Back offers additional protection from binding abrasions and boosts control and precision. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. Whether you're reliving the glory days or experiencing it for the first time, the ID is the ultimate evolution of a true classic, now better than ever.

LARA WMN LTD.

secca
S3F 572666-2000/4229

Introducing the all-new Lara WMN x SECCA Snowboard Boot — a collaboration built around women’s needs. SECCA has always designed boards with female riders in mind, rare in a male-dominated snowboard scene, giving women more visibility and the right gear. Now, we’re bringing that same philosophy to a boot, combining fit, comfort, and performance with signature Japanese design flair.

The limited version of the Lara WMN boot features a construction based around a softer shell for an unrivaled fit and a forgiving ride. Its BOA® Fit System cradles the contours of your foot for exceptional comfort and response. The boot also sports a refined asymmetrical Power Strap to provide effortless adjustments that allow you to attain the perfect fit. To further boost performance and comfort, we’ve infused the Lara WMN LTD. with our Stage 3 liner and Freestyle Tongue. A redesigned tongue handle makes the boot easier to put on and take off. Consider the Lara BOA LTD. your new best friend.

NEXT GENERATION

ROUGH DIAMOND

black
ST1 572029-3005/9110

Just because groms have small feet doesn't mean they can't go big. The Rough Diamond channels DEELUXE's legendary quality and technology into a kid-specific design and construction. With an emphasis on comfort and performance, this boot accelerates progression. It also delivers no short-age of style thanks to the legendary artwork of former DEELUXE pro TJ Schneider. Especially easy to get in and out of, the boot features a refined Power Strap and the BOA® Fit System for a fast, effortless, precision fit. Its tried and tested Stage 1 liner offers plenty of comfort and warmth so kids can enjoy the slopes even longer. The Rough Diamond is also designed to accommodate a grom's rapid growth. Because the BOA® Fit System and Stage 1 liner cradle the contours of the foot especially well and provide exceptional heelhold, we recommend purchasing the Rough Diamond one size larger than a child's current boot size. This affords room to grow without compromising the boot's fit or performance. After all, the next generation of shredders deserves the best.

SL 562100-1000/9110

At DEELUXE, we're guided by a commitment to continual refinement. And this is especially evident in the Footloose 2. After debuting the world's first boot dedicated to powsurfing and noboarding—the Footloose—to rave reviews, we immediately began soliciting feedback from the powsurf community on how we can evolve the boot and further support those who love to ride without bindings. This led to the creation of the Footloose 2, a boot born from a desire to bring a completely new look and feel to powsurfing. It sports a proven powsurf-specific liner that enhances both foothold and mobility, affording better board control and making it especially easy to initiate smooth turns. We've also repositioned the lacing for even greater heelhold. And a double-lasted toe cap boosts durability while offering additional grip for those looking to ollie and infuse their riding with skate-inspired tricks. Welcome to a completely new powsurfing experience.

CUSTOM THERMO LINER (CTF)

To lead, one must innovate—and DEELUXE’s Custom Thermo Fit liner charges into the future. With fresh technology and a sophisticated design, it makes its debut as the best custom fit liner in the game. With a precisely tailored anatomical design and an advanced perforated foam, it cradles the contours of your foot while maximizing performance. For the perfect blend of warmth and breathability, the perforated foam also aids in regulating temperature. The Heel Harness Pro and its exoskeleton deliver an unrivaled fit at the ankle and exceptional support. And thanks to a deep heel pocket and an ankle zone with mesh that’s especially grippy, the Custom Thermo Fit liner provides unsurpassed heelhold. To customize the liner’s fit even further, it can be thermomolded with DEELUXE’s Liner Precision Fit Pads. No wonder the Custom Thermo Fit Liner stands to be a favorite among riders and bootfitters alike. Reimagine what’s possible with DEELUXE’s Custom Thermo Fit liner.

FLEX BOOSTER

Available as an accessory, the Flex Booster strengthens a boot’s tongue, creating a stiffer flex while offering additional support. It can also prolong the life of a boot by restoring or enhancing its flex. Thanks to a progressive design, it provides greater resistance as it bends, optimizing support and protection – especially from harsh landings. As icing on the cake, the Flex Booster enables you to modify a boot’s flex for specific adventures – be that reinforcing the flex of a jib boot to slay kickers or transforming a freestyle boot into a banked slalom hero. You don’t need gym shorts to appreciate this flex.

LINER THE DEELUXE LINER CONCEPT

Whether you’re sessioning the streets, lapping the bunny hill, or dropping first descents, your boots play an essential role in shaping your time on the snow—and your liners serve as the foundation of it all. Guided by this belief, we’ve leveraged our experience pioneering and continually refining thermo custom fitting to completely reimagine the philosophy, design, and construction of our liners. Combining the best of both worlds, all of DEELUXE’s adult liners are thermomoldable while also offering our legendary out-of-the-box comfort. And each liner is purpose-driven and tailored to a distinct riding style, perfectly complementing the diverse boots in our collection. It’s time to demand more—elevate your game and your expectations with DEELUXE’s innovative liners.

STAGE 1

STAGE 1

ONE

The next generation of riders deserve the best—and DEELUXE is here to help. Designed specifically for children’s feet, our Stage 1 liner offers exceptional comfort and performance straight out of the box. It also keeps feet incredibly warm. And with a design that’s as simple as it is elegant, this liner makes it especially easy for kids to put on and take off their boots. Thanks to DEELUXE’s Stage 1 liner, groms can keep smiling and progressing from first chair to last.

STAGE 2

STAGE 2

TWO

Consider it love at first sight—or first fit. With an emphasis on comfort, DEELUXE’s Stage 2 liner offers an unsurpassed out-of-the box fit. Inspired by DEELUXE’s iconic Comfort Flex liner, it sports a fresh highback shape to enhance heelhold and performance. And for a custom fit, the liner can also be thermomolded. Whether it’s your first day of the season or your hundredth, the Stage 2 liner shares your passion and fuels your progression.

STAGE 3

STAGE 3

THREE

When it’s time to elevate your game, lace up with DEELUXE’s Stage 3 liner. To maximize comfort and performance, it sports a design inspired by DEELUXE’s legendary Thermo Flex liner, which previously served as the gold standard in snowboarding for thermo-moldable boots. Raising the bar even higher, the Stage 3 liner offers an excellent fit straight out of the box and can easily be thermomolded at your local DEELUXE dealer for a truly custom fit. For enhanced comfort, the liner also features a roomier toe box with a four-way-stretch material that can be thermomolded with or without toe caps. And to further boost performance, the liner’s external heel harness cradles your foot to provide exceptional heelhold and quick and secure lacing. Drop in and never look back with DEELUXE’s Stage 3 liner.

STAGE 4

STAGE 4

FOUR

Hold nothing back with DEELUXE’s Stage 4 liner. Featured in some of the finest boots in our collection, this premium liner delivers an unprecedented out-of-the-box fit. With a precisely tailored anatomical design and a refined heel pocket, the liner hugs the contours of your foot while maximizing performance. An external heel harness further cradles your foot while providing exceptional heelhold, as well as quick and secure lacing. For additional comfort, the Stage 4 liner sports a roomier toe box with a four-way stretch material. The freshly-designed back panel further enhances the liner’s fit while optimizing support. And for an unsurpassed custom fit, the liner can be thermofitted—with or without toe caps. Unleash your potential with DEELUXE’s Stage 4 liner.

STAGE 5

STAGE 5

FIVE

Introducing the all-new Stage 5 Snowboard Boot Liner: built for ultimate comfort and (peak) performance. It combines an exceptional out-of-the-box fit with 100% thermomoldable materials, allowing perfect customization to the shape of your feet. This makes the Stage 5 Liner a favorite among boot fitters. Enjoy warmth from the Gold Tread Technology and all-day cushioning with Comfort Core Padding. The advanced Heel Harness Pro ensures a secure fit, while the cat-tongue mesh lining provides outstanding heel hold. The liner is anatomically shaped for enhanced comfort and features an extra insole made from a breathable and antimicrobial foam that provides excellent arch support. An anti-slip zone at the base maintains a solid connection between liner and shell, giving you stability and control with every ride.

STAGE 3F LINER

STAGE 3F LINER

THREE F

The all-new Stage 3F Liner is purpose-built for women, combining plush, warm materials with a snug, supportive fit. Its anatomical shape provides extra space around the calf, while a low, soft collar eliminates pressure for all-day comfort. Front and back pull loops ensure easy entry and exit, and the proven DEELUXE Heel Harness keeps your heel locked in for superior control on every run.

LINER THE DEELUXE LINER CONCEPT

CUSTOM THERMO FIT LINER

CTF

To lead, one must innovate—and DEELUXE’s Custom Thermo Fit liner charges into the future. With fresh technology and a sophisticated design, it makes its debut as the best custom fit liner in the game. With a precisely tailored anatomical design and an advanced perforated foam, it cradles the contours of your foot while maximizing performance. For the perfect blend of warmth and breathability, the perforated foam also aids in regulating temperature. The Heel Harness Pro and its exoskeleton deliver an unrivaled fit at the ankle and exceptional support. And thanks to a deep heel pocket and an ankle zone with mesh that’s especially grippy, the Custom Thermo Fit liner provides unsurpassed heelhold. To customize the liner’s fit even further, it can be thermomolded with DEELUXE’s Liner Precision Fit Pads. No wonder the Custom Thermo Fit Liner stands to be a favorite among riders and bootfitters alike. Reimagine what’s possible with DEELUXE’s Custom Thermo Fit liner.

BC LINER

BC

Crafted for earning turns and tackling any terrain, DEELUXE’s Backcountry liner pairs powerful performance with a streamlined, light weight build—reducing bulk and overall boot length for improved efficiency on the ascent. Its precise anatomical shape and perforated foam offer an exceptional out-of-the-box fit while enhancing temperature regulation and breathability. A roomy toe box and four-way-stretch thermomoldable materials promote natural movement and all-day comfort. For a truly customized fit, it’s compatible with DEELUXE Liner Precision Fit Pads. Meanwhile, the Heel Harness Pro, supportive exoskeleton, and deep heel pocket deliver outstanding heel hold and control. Light, agile, and ready for big missions—meet the Backcountry liner.

SURF LINER

This surf-bootie-inspired liner delivers a unique board feel when pow surfing.

HEEL HARNESS PRO

DEELUXE’s Heel Harness Pro enables your heel and ankle to transmit maximum power and efficiently initiate turns. Available as an accessory, this super-charged Heel Harness and its exoskeleton deliver an unrivaled fit at the ankle area, exceptional support, and unsurpassed heelhold.

LACING

Traditional lacing provides a classic look and feel.

LACESMART®
SPEEDLACE SYSTEM

The patented LACESMART® speedlace system is designed to deliver fast, effortless lacing with precision you can feel. Built around independently adjustable lacing zones, LACESMART allows riders to fine-tune the fit of their boots for optimal support, heel hold, and energy transmission. Whether using dual-zone (L2) or triple-zone (L3) configurations, each handle tightens a specific area of the boot, making it easy to dial in the exact tightness you need—instantly and without compromise. The result is a secure, customized fit that adapts to your riding style and keeps you locked in from first chair to last lap.

L2

The L2 lace configuration allows you to fine-tune two independent zones—the lower part of the boot and the upper section. By adjusting each zone separately, you achieve a precise, supportive fit that enhances energy transfer to your board.

L3

The L3 lace configuration provides three adjustable zones for a fully customized fit. One zone wraps the lower and upper parts of the boot, while the others focus specifically on ankle and heel support. This targeted setup improves heel hold and boosts overall control.

BOA® FIT SYSTEM

Dial in to micro-adjustable precision fit with the BOA® Fit System, which delivers more explosive action and unparalleled accuracy. Boots with a dual zone BOA® configuration provide zonal adjustability so you can create a truly customized fit, for even longer days on the hill. The BOA® Fit System is engineered to perform in the toughest conditions.

L3 BOA®

Consider it a match made in heaven—or at least on the snow. To create a next-level fit that's especially precise, we've teamed up with BOA® to develop our new L3 BOA®. This fresh design combines the advantages of our proven L3 lacing system with the signature performance of the BOA® Fit System. Thanks to this revolutionary pairing of L3 and BOA®, you can separately and precisely adjust the foot and calf area of your boot with one dial and secure the ankle and heel area with a second dial lightning fast. Powerful and precise, the L3 BOA® delivers exceptional performance without compromising comfort. Throw down in confidence with the L3 BOA®.

TRADITIONAL LACING

Traditional lacing provides a classic look and feel.

POWER STRAP

This strap provides extra support for your shin to enhance your boot's response.

BOOT TONGUES THE DEELUXE TONGUE FLEX CONCEPT

A boot's tongue plays a crucial role in shaping its flex—yet it's often overlooked. To maximize performance and comfort, we've completely redesigned the tongue of our boots, tailoring them to the terrain and riding style for which each model is designed. With a nod to skate shoes—which offer a slew of tongue and padding options to meet one's personal preferences—we've carefully developed each tongue around the unique demands of our boots and the riders who rock them.

BLASTER TONGUE

The Blaster Tongue takes inspiration from the groundbreaking Boost Tongue and pushes the concept even further. With minimal seams and a streamlined construction, it uses only what's needed – nothing more – resulting in a design that's lighter, stronger, and built for maximum durability. Wrapping seamlessly around the shin, the Blaster Tongue creates a precise, locked-in fit that translates into an even more direct riding feel. An integrated handle makes opening and closing effortless, adding a practical touch to high-performance design. For riders chasing uncompromised response and long-lasting reliability, the Blaster Tongue is the clear next step.

BOOST TONGUE

Taking the concept of the Flex Booster to the next level, we proudly introduce the Boost Tongue. It wraps seamlessly around the shin for an exceptional fit and a streamlined profile. Providing reliable support with a slightly more forgiving flex, the injected TPU Boost Tongue offers long-lasting, consistent response from day one to the end of its lifespan. Perfect for riders who want a supportive ride without sacrificing comfort and tweak-friendly freedom.

FREERIDE TONGUE

DEELUXE's Freeride Tongue is a smooth operator. Especially plush, it maximizes comfort and cushioning while also enhancing durability. At home exploring the entire mountain, it loves to lay down turns that are especially smooth. And for a truly custom ride, the Freeride Tongue sports a three-position pocket that can accommodate an optional Flex Booster. This enables you to personalize the flex of your boot and tailor it to be either symmetrical or asymmetrical. Make your mark all over the mountain with DEELUXE's Freeride Tongue.

FREESTYLE TONGUE

As versatile as it is dependable, DEELUXE's Freestyle Tongue is the perfect choice for riders who view the entire mountain as their playground. Armed with a classic appearance and medium padding, it offers a precise boot-to-binding interface and effectively transmits power while also enhancing dampening. And to enable you to further tailor your boot's flex to your riding style, it sports a single-position pocket for an optional Flex Booster. Kickers, side hits, and rails—the Freestyle Tongue can handle it all.

JIB TONGUE

Lean and mean, DEELUXE's Jib Tongue is at home in the park and the streets, yet it's also perfect for anyone seeking an incredibly precise and responsive ride. Especially thin, this deconstructed-style tongue offers maximum power transfer and a direct boot-to-binding connection. Its clean appearance is perfectly paired with traditional laces, yet the tongue excels with any lacing system. And to enable you to further customize your boot's flex, the Jib Tongue has a single-position pocket that can accommodate an optional Flex Booster. Whether locking in your boardslides or boosting your ollies, the Jib Tongue delivers the power and precision you need to take your riding to the next level.

SHELL CONSTRUCTION

RAPID REACT MODULAR TECHNOLOGY

Rapid React Modular Technology gives you a glimpse of the future and opens a new era of how a snowboard boot should perform and respond. It combines different features of a boot that are perfectly adjusted to bring your performance to a new level. For the ID Y-20 we've combined an injected Booster tongue and the pre-shaped, injected TPU Flex Guard. The specially developed Power Link connects the Flex Guard with the sole to ensure efficient power transmission from the heel to the toe edge. This makes the boot extremely reactive, gives you unprecedented board control and let's you transition lighting fast from edge to edge.

FLEX GUARD ATV

Building on our proven concept, the Flex Guard ATV takes heel support to the next level. With a stiffer, more stable construction and extended side coverage, it provides enhanced protection around the heel while creating an even more secure hold in the binding. The pre-shaped, injected TPU design improves durability, shields against binding abrasions, and helps you get in and out of speed-entry bindings with extra smoothness. For riders who demand extra support, control, and long-lasting reliability in any terrain, the Flex Guard ATV redefines heel support.

FLEX GUARD FREESTYLE

The pre-shaped Flex Guard Freestyle stabilizes the heel area of your boots, delivering an excellent fit and a secure hold in the binding. It also enhances durability by protecting against binding abrasions, while strategically placed stringers help you get in and out of speed-entry bindings with extra smoothness. This injected TPU Flex Guard is optimized for freestyle riding, providing the stability you need without making your boots too stiff.

D-TEX

Waterproof and breathable, this membrane ensures feet stay warm and dry.

THERMO BLOCK

Like a space blanket for your feet, this reflective insert maximizes warmth.

RISE BY BLOOM

Rise is an environmentally-conscious, high-performance replacement for traditional petroleum-based EVAs. Foams utilizing Bloom's algae technology deliver striking performance values, which make them excellent replacements for conventional foams. Algae's natural thermoplastic qualities allow Rise to meet, and in some cases exceed, performance characteristics of conventional closed-cell flexible foams.

POWER LINK

The specially developed Power Link connects a boots high back with the sole to ensure efficient power transmission from the heel to the toe edge. This delivers an unprecedented level of responsiveness for an exceptional riding experience.

COMFORT CORE

Strategically placed Comfort Core cushions provide an incredibly plush ride.

SNOW SHIELD

The Snow Shield protects the lower part of the boot from snow, ice, and moisture to keep your feet dry.

SIDEKICK PRO

It's time to meet your new partner in progression—DEELUXE's Sidekick Pro. Building on the success of the Sidekick, this supercharged version uses a high-frequency welding process to fuse lateral and medial reinforcing elements to the boot's shell. This creates an especially snappy ride that provides lightning-fast transitions from edge to edge and exceptional pop when ollieing. And by offering additional security, it reduces the likelihood of rolling your ankle. When it's time to charge hard, the Sidekick Pro loves to throw down.

DOUBLE BACK

Good things are worth doubling down on—for proof, look no further than DEELUXE's Double Back. This reinforced rubber highback at the boot's heel zone enhances durability by offering protection from binding abrasions. It also stiffens the boot to boost response and adheres better to a binding's highback. By improving the interface between the boot and binding, the Double Back reduces movement between them, offering greater control and precision. Don't look back—just charge forward with DEELUXE's Double Back.

BACKBONE

This reinforced panel cradles the back of the boot to maximize durability and enhance response.

XLS

For enhanced comfort and longer strides when skinning, this system extends the range of motion available at the rear of the boot. Simply put, it helps you get up the mountain faster—and with less effort.

BACKWELT

The plastic backwelt features a grooved heel for rocking semiautomatic crampons.

ROCKGUARD

This layer of rubber wraps around the toe box and sides of the boot, maximizing durability by providing protection from rocks and ice.

SOLES

SOLE CONCEPT

At DEELUXE, every boot we make is tailored to a specific riding style and type of terrain. And our soles play a crucial role in shaping these purpose-driven designs. With an approach inspired by skate shoes, we’ve developed an arsenal of soles that cater to the unique needs of today’s riders. Whether you’re sear-ching for unrivaled response when cranking out turns, bombproof durability for backcountry missions, exceptional cushioning for slaying kickers, or maximum boardfeel when sessioning the streets, DEELUXE’s soles are ready to make your dreams a reality.

FLEX RATE

The all-new Spectra sole combines the ultimate blend of board feel, grip, and impact absorption.

The rear area of the sole is thicker and features an EVA midsole with a hollowed section in the heel zone that absorbs impact energy and provides a perfectly smooth landing. This EVA midsole tapers down towards the front of the foot, where extra flexibility and feel are needed. In the toe area of the sole, the lugs are thinner and connected from the outer edge to the interior, ensuring maximum board feel and control. Armed with a reduced footprint and a specially grippy rubber compound that allows you to walk safely on snow and ice, the Spectra sole is a true all-terrain favorite.

QUANTUM SOLE

Make the entire mountain your playground with DEELUXE’s Quantum sole. Designed to truly do it all,

the Quantum leverages everything we’ve learned from developing soles over the past few decades. Crafted from minimal materials and armed with a reduced footprint, it creates an especially direct interface with your board while also offering the best all terrain capabilities. To dampen vibrations and boost traction, lugs span the entirety of the sole, increasing in height from the toe to the heel. The low-profile lugs in the toe area maximize boardfeel while the taller lugs in the heel zone provide an especially smooth ride. These lugs also extend to the outside edge of the sole to further enhance traction when traversing and hiking. The Quantum’s free-floating cushion swallows up impacts and reduces the risk of heel bruises. And thanks to its extensive arch support, the sole prevents fatigue to keep you riding from first chair to last. Unleash your creativity with DEELUXE’s Quantum sole.

BATTLE SOLE

DEELUXE’s Battle sole is a true warrior. This hybrid design builds on the tried-and-true technology of our

Remedy and Skate Flex soles to place an even greater emphasis on power and precision. By enhancing the transmission of energy, it offers more control and faster edge-to-edge transitions. It also boosts boardfeel while providing exceptional cushioning for protection from harsh impacts. And thanks to a reduced footprint, it minimizes toe and heel drag. Hold nothing back with DEELUXE’s Battle sole.

VIBRAM SOLE

No matter the adventure, you can depend on the Vibram Eastridge sole. With an emphasis on traction and durability, it excels whether you’re hiking, skinning, or riding. Its proven Vibram ICETREK rubber compound is specifically engineered to endure very low temperatures and provide superior grip on cold and icy surfaces. Special climbing zones in the toe and heel area offer additional traction to make ascents safer and easier. And thanks to lugs with a self-cleaning design, the sole readily sheds snow, dirt, and rocks. Get ready to explore with the Vibram Eastridge sole.

REMEDY SOLE

You don’t need a prescription for DEELUXE’s Remedy. Especially versatile, the Remedy sole provides the perfect blend of traction and cushioning. It offers exceptional grip while hiking and when it’s time to send it, the sole’s free-floating heel cushion ensures smooth landings. And thanks to a reduced footprint, it minimizes toe and heel drag. Give your feet the treatment they deserve with DEELUXE’s Remedy sole.

SKATE FLEX SOLE

Forget the griptape and trucks—DEELUXE’s Skate Flex sole provides the ride you need. Inspired by skate shoes, the Skate Flex sole is super grippy and offers enhanced boardfeel. And for protection from harsh impacts and flat landings, select models feature Slytech Shock Absorption in the heel. Whether you’re lapping the park or sessioning the streets, the Skate Flex sole rides like a champ.
